

## Davis Kennels Summer Training Program on the Canadian Prairies *for field trial dogs & personal hunting dogs*

### Why Send Your Dog to the Canadian Prairies with Us?

Whether yours is a field trial dog or personal hunting dog and companion, whether your dog is a youngster or more mature, they will benefit from our Summer Training Program on the Canadian prairies.

We have brought our field trial string and our client dogs for the past three decades to work on sharptail grouse and Hungarian partridge and to condition dogs for the upcoming field trial or hunting season. Whether you compete your dog on liberated birds or wild birds, whether you preserve hunt or travel the country hunting wild birds, nothing benefits a dog more than proper exposure to wild birds.

Young dogs learn faster exposed to sharptail grouse than on any other species of game bird simply because a covey rarely flushes all at once, allowing the dog to make an error, be corrected, and then succeed in holding steady for the next flushed bird. Ample opportunities – with the right trainer – to repeat this process results in the dog becoming broke on birds without confusion thus retaining the dog's enthusiasm to find more birds. The dog's inability to catch wild birds hastens the process and avoids unnecessary training pressure.

## What Davis Kennels Offers You and Your Dog

- We have always and continue to take only a limited number of dogs to the prairies assuring that your dog will be worked on a regular basis. (We take between 20 and 25 dogs.)
- Each individual dog's training is tailored to their requirements depending on their age, training level and the owner's objectives.
- We personally work all the dogs we bring to our summer camp.
- Our successful training program is based on years of professional experience by Field Trial Hall of Fame trainer Colvin Davis. Colvin has been training and conditioning dogs on our Broomhill grounds for countless years.
- We offer an abundance of wild birds on the vast acreage we have access to. We have long established and excellent relationships with our neighbors whose land we utilize for training and the end-of-the-season trials.
- Correct and proven roading methods to assure your dog comes off the prairie in peak physical and mental condition and ready for trialing and hunting.
- We feed only the best – Purina Pro Plan Performance to all of our dogs. Each dog is fed according to their weight requirement to keep them in optimum health. Only a healthy dog can truly benefit from training on the prairies.
- We have great relationships with excellent veterinarians sixteen miles from our camp in Melita should your dog require veterinary care. You entrust us with your dog's care and well-being and we take that very seriously.

## What is the Cost?

- The fee per dog, which includes transportation, training, care and feeding is \$1,500 for the three months they are with us. At less than \$17 per day, this is a tremendous value!

## What are the Arrangements?

- We leave Alabama in early July and return in late September.
- We can arrange to meet you at a designated location on our trip to Canada or you can bring your dog to our kennels here in Alabama. You can also ship your dog to Montgomery, AL by plane prior to our leaving and we will arrange pick up at the airport which is only 45 minutes from our kennel.

## Booking Your Dog for our Summer Prairie Training Program

- We are taking bookings now and fill up quickly so please contact us soon if you would like to take advantage of our great Summer Training Program!
